Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	**DigitsSum.java**	
INPUT	**PROCESS**	**OUTPUT**
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
The user repeatedly types integer guessing ranging from integers 1-20.	The program generates a random actualNumber ranging from 1 and 20. Prompts the user and reads their userGuess The program will run a while loop, so it will keep on going while the user is typing integer 1-20. It will check if userGuess== actualNumber, If it is true, it will print a win message and break If it is false, prompt the user for a new guess and continue with the loop	Result messages, If the user won; print “You WON!” If user lost; print “WRONG, Try again”
